## PERFECTION AS STANDARD

Looking for PVC windows for your home? Discover WIŚNIEWSKI WINDOWS and find out why they are the best choice!

PRIMO 86 | Smooth Silver Grey

### W stands for world-class quality

We overlook each stage of window manufacturing, which has been confirmed by the prestigious IFT Quality Silver certificate! You can be sure that you are buying a comprehensive product.

### W stands for well-thought-out comfort

WIŚNIEWSKI windows will protect you from the cold, heat, and noise. They give you the comfort and security you and your family deserve.

PRIMO 86 | Dark Grey Silk

WIŚNIEWSKI windows combine proven materials and state-of-the-art processes. This is why we manufacture the best windows. The W windows.

**How are the PRIMO windows made? Scan the code and see for yourself!**

PVC window  
**PRIMO 82**

PVC window  
**DEVELO**

**Gaskets**

A triple gasket system available in three colours: grey, caramel (available only in the PRIMO window), and black. Thanks to central tightening, better parameters are ensured and improve the joinery's thermal efficiency, with the profile divided into a "dry" and "wet" chamber, thereby increasing the durability of hardware elements.

**Glazing**

The PRIMO windows use a 3-glass unit  $U_g=0.5 \text{ W/m}^2\text{K}$  infilled with argon and employ an optional warm edge between the panes available in 6 colours.

**Aesthetics**

The V-Perfect seam is barely noticeable to the human eye. It makes it possible to obtain the effect of a perfect bond, which cannot be achieved using any other technology.

# Aluminium Windows **FUTURO**

## UNLIMITED POSSIBILITIES

Aluminium is a material that will help you make all your dreams come true – from classic windows to magnificent façades.

**ALUMINIUM**

It is a material that is well-known for its exceptional durability. Choose ALU windows and enjoy their elegance for many years to come!

FUTURO | HI MODERN GRAPHITE

### W stands for well-lit

Thanks to its durability, aluminium works perfectly with large-size glazing, which is becoming more and more popular.

### W stands for design without constraints

The FUTURO series includes fixed windows, tilt-only windows, as well as patio doors, façades, and partition walls. It is the most comprehensive product collection for your home.

FUTURO | HI ANTHRACITE

WIŚNIEWSKI windows combine proven materials and state-of-the-art processes. This is why we manufacture the best windows. The W windows.

Scan the code and see the production process of the FUTURO windows.

FUTURO aluminium window  
**MB-79**

**Versatility**

The FUTURO windows will be the perfect match for all types of buildings. You can choose their shape, size, and colour based on your needs – the possibilities are almost endless. Minimalist, simple design lines of the windows go hand in hand with the latest architectonic trends.

**Glazing**

Aluminium windows – especially when used as marvellous façades or patio doors – make it possible to use the available light to the fullest. A brighter room helps you relax and can decrease the electricity bill.

**Thermal insulation**

A thermal break combined with a circumferential central seal provides thermal comfort, so important for your family.

Thermal  
insulation

Low  
threshold

### Glass panes

Double and triple glazing. The thermal insulation can be further improved with a warm edge available in 6 colours.

**A 5-chamber leaf with a depth of 82 mm.** Class A closed profile with an outer wall thickness of 3 mm. Makes it possible to manufacture large-size structures, while at the same time ensuring maximum tightness.

### Aesthetics

The V-Perfect technology guarantees the perfect look of the windows for undeniable appeal.

### Threshold thermal insulation

The PVC threshold structure maintains high thermal insulation, while the aluminium threshold covers raise its aesthetics to another level.

The PRIMO SkyMotion and SkyMotion Max patio doors combine the advantages of windows and doors. They guarantee security and safety for your home, while allowing the light inside to brighten the rooms. Thanks to a low threshold and easy operation, they ensure convenience whenever you go out to the garden or patio. The HST PRIMO is also available in the SkyMotion Max version with even larger glazing.

### WARRANTY

The HST PRIMO patio door is covered by a warranty for up to 5 years. WIŚNIEWSKI – a partner you can trust.

smartCONNECTED

**Gorgeous!**  
Can be designed  
as openable  
corner glazing

Safety

Thermal  
insulation

Large  
glazing

### Glass panes

The tight glass panes let plenty of natural light inside, while at the same time protecting against the cold and heat.

### Profile

The most important structural element of all windows. Thanks to the thermal break, the profiles provide appropriate thermal insulation.

### Low threshold

A threshold which sits perfectly flush with the floor level is visually appealing and makes exiting and entering exceptionally convenient.

### Durability

Aluminium is an incredibly durable material. The FUTURO windows will be a functional element of your home for many years to come!

The FUTURO aluminium patio doors offer even more options when choosing windows for your home. Durable and light, aluminium makes it possible to design panoramic glazing that will open your home to the surroundings, while at the same time providing access to natural light. More sun equals cheaper heating and better well-being!

# Hardware

**A lifting mishandling device and leaf lifter.** Protects the leaf against hanging solely on the bottom hinge and helps to close it shut. This makes the window safer and more convenient in use.

**Anti draught lock.** Used in the RU leaf, it holds the tilted leaf in a fixed position even in the event of a draught.

**Microventilation in the scissor stay.** Each RU window is fitted with a microventilation feature for proper temperature and humidity adjustment in the room.

**i.S. smart roller locking system** Provides easy operation and 100% security. Thanks to an automatic height adjustment, the rollers always move easily and lock with precision.

**Bottom striker plate.** Ensures complete precision. This element makes it possible to safely close the leaf shut even if the leaf drops.

You can choose more window accessories, e.g. for anti-burglary windows choose the i.S. strikers instead of the standard version and adjust the number to the selected protection class.

Central locking, i.S. smart rollers, and leaf lifter are all included in the base hardware accessories. **Accessories available in the PRIMO, DEVELO, and FUTURO lines**

4

**Anti-burglary strikers.** (2 per leaf as standard). Improve the locking security. Make the leaf sit tight with the frame. The anti-burglary strikers are fixed with 3 screws, which makes it harder to force the window open.

5

**Multi Power.** A hardly visible and innovative element that can resist loads of up to 150 kg. Can be combined with a low threshold.

6

**Komfort scissor stay.** Thanks to a special structure, the scissor stay arm tilts or shuts the window by rotating the handle by 180 degrees.
