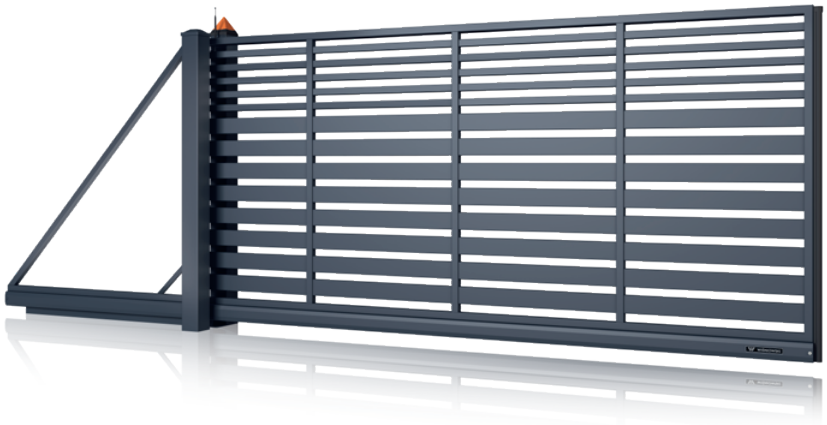
Sliding gates

What kind of property? A sliding gate needs more space on the sides of the entrance, which is why it will be perfect for properties with a wide front.



Single- and double-leaf gates

What kind of property? They don't need space on the sides, but take up more space between the entrance and the garage. This is why they are recommended for narrow, but relatively long driveways.

Folding gates

What kind of property? They combine the advantages of sliding and double-leaf gates. Thanks to their structure, they don't take up too much space. Perfect for narrow and short driveways.

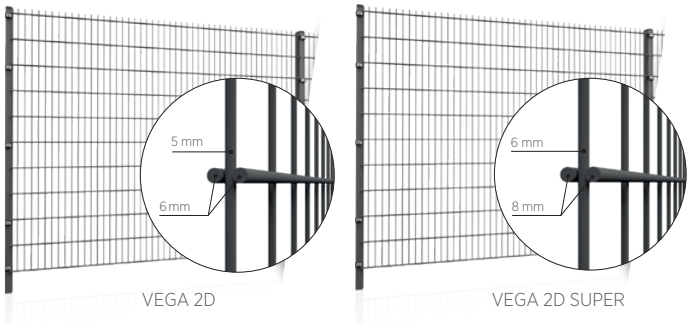
Panel fences.
Perfectly versatile

WIŚNIOWSKI mesh panel systems are a solution used in places where durability, high quality, and safety are crucial. They can be used in urban areas, industrial areas, as perimeter protection in recreational areas or as a complement to a typical residential fence.

Panel fences include mesh panels, entrance gates, and wickets. Create complete fences and, thanks to original installation systems, get a guarantee of security and durability.

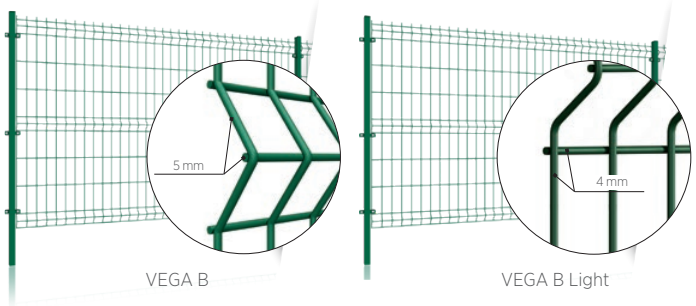
Together or separate? Mesh panels are increasingly used as additions to classic residential fences – for instance only on the sides and back of the property. Economical, safe, and quick.

2D mesh panels



Panel without ribs reinforced with a double wire with a larger gauge.

3D mesh panels



Panels with ribs ensure maximum resistance to deformation.

The method of corrosion protection and the type of material used are responsible for the quality of the mesh panels. WIŚNIOWSKI panels are manufactured using a process that minimizes the occurrence of corrosion for many years and additionally guarantees fence robustness. **Check the quality of the panels before you choose yours.**
